

**Human Exposure / Adverse Effect Incidents
Involving Monsanto Agricultural Products**

Reporting Categories: H-A, H-B, H-C

Reporting Period: March 1, 2017 to March 31, 2017

Substance:	Roundup Weed and Grass Killer 1 Ready to Use from Monsanto
Serial Number:	32411165
Date:	04/26/2017
Medical Outcome:	Moderate Effect H-C
EPA Reg. No.	71995-23
Active Ingredients:	Glyphosate 1.92%
State:	Pennsylvania
History and Notes:	Adult, 69 year old male, calling to state he sprayed Ready to Use Roundup 3 to 4 years ago. He used a weed eater on the treated grass a few days later while wearing shorts. He then developed a rash on his legs that prevents him from wearing shorts. The man is certain the cause of the rash is Roundup. He is treated at the VA and has cream he applies twice a day. The man does not know the name of the cream. He has an appointment next month with the MD and was told if it does not improve then will have to go for testing. The cream does help with itching. The caller wants to know if he should know anything about Roundup. MRPC discussed the product toxicity. The symptoms do not correlate with the expected response to the product with delayed onset rash to dried residue on previously treated grass. Advised to have MD contact MRPC as needed.
